Dr. and Mrs. Richard Steckel
The Milestones Project
5443 South Prince Street
Littleton, CO 80120

Dear Dr. and Mrs. Steckel,

Thank you so much for the "permanent loan" of the *Milestones* exhibit in our building. It is truly beautiful, and has received many compliments. The hallways look completely different from before. Our child-focused program has been enhanced by the child-focused décor!

As you may know, The Village for Early Childhood Education is a unique program of Littleton Public Schools. We serve approximately 320 children ages 5 years old and younger. A wonderfully diverse group of children make up our student body, and a dedicated staff enjoys every day with them. Our program consists of Head Start and Colorado state-sponsored children at risk for kindergarten difficulties, tuition-paying families, Special Education children with mild to moderate needs, and English Language Learners. In addition, our Infant and Toddler program starts children as young as six weeks of age, and promotes growth through the different developmental stages.

Our non-profit program serves student needs with quality lead teachers and teaching assistants, as well as licensed therapists and specialty teachers. Our office also tries to meet family needs through parenting partnerships and resources.

It is hard to find the time and resources to add the character that your project has given to our entire building. The time that both of you spent selecting, hanging, arranging, and caring about how the *Milestones Project* was presented at The Village was very special to all of us. The diversity in your photos is appreciated by our students and their families, as we serve people from many countries. Thanks for bringing the meaning and purpose of your project to our school!

Sincerely,

Melissa Radulovich
Principal
